REVIEW:

FOR KEEPS was a fun book to read about a girl who's lived her whole life without a dad and her mom who has suddenly started dating someone. Josie isn't sure whether she likes this relationship, but she tries to deal. Then when her long lost grandparents suddenly return to town she can't help but wonder what her dad could be up to. With the help of her friend Liv, she'll find what to do.

I was caught up in the story and kept on reading. I liked how things were revealed and things finally made sense. The way things had just coincidentally happened. A story about how you come to be, and how you get to know your past. I loved it that I began reading in the morning and finished that evening on the same day. If you're a fan of Sarah Dessen, you'll like Natasha Friend!
